Reptile Husbandry

One of the most important, and most basic, things that aid in maintaining good health for your reptile begins with their home. Please take a moment to fill out this information sheet so our Doctors' and staff have a better idea of where your reptile lives. We will keep this sheet in your file, please tell one of our staff members if anything has changed so we may update our information. If some of the following do not apply, please skip.

Living Space

- Size/dimensions of living space: _____ gallons/litres, L _____, W _____, H _____,
- Substrate/bedding? If so, what type? _____
- Any plant life, real or otherwise? If so, please specify plant type: _____
- Does your pet share his/her living quarters with any other pets? _____
- How often is the bedding or water changed? _____
- How often is the entire enclosure cleaned thoroughly? _____
- What disinfectant do you use to clean it? _____
- Have you made any recent changes to your pet's environment?

Heat and Lighting

- What type of heat source(s) is supplied? _____
- What type of thermometer do you use? _____ Where is it located? _____
- What are the enclosure temperatures currently:
Hot side _____ Cool side _____ Basking spot _____
Night temperature _____
- If overhead heat lamp is used, what type/watt bulb is used? _____
- How long each day is the heat source kept on? _____
- Do you provide UVB lighting? _____. What type/watt bulb do you use? _____
- How close can your reptile get to the UVB bulb? _____
- How often is the bulb replaced/when was it last changed? _____
- What time is lighting turned on/off? _____

Humidity

- Source (misting, soaking, fogger etc.)? _____
- If misting or soaking, how often? _____
- What is the current humidity level? _____

Aquatic/Semi-Aquatic Reptiles Only

- How deep is the water in the enclosure? _____
- What type/size of filter do you use? _____ How often is the filter replaced? _____
- What are the temperatures of the water: Hot end _____ Cool end _____
- Is there a haul-out/dry area where your reptile can be completely out of the water? _____
